COMPREHENSIVE CARE OF HAEMOPHILIA

6th-7th & 13th-14th

NOVEMBER 2020

ABOUT AHAD-AP

Association for Haemophilia and Allied Disorders-Asia Pacific (Previously known as APHWG) was formed in 2014 as an independent group of health professionals involved with the care of people with haemophilia and related hereditary bleeding disorders from the Asia Pacific region, with the aim to improve care for people at risk for haemophilia and other hereditary bleeding disorders in the Asia Pacific region. Countries and regions currently represented include Australia, China, Hong Kong, India, Japan, Malaysia, Singapore, South Korea, Taiwan, Thailand and Vietnam.

Over the last 3-4 years AHAD-AP has evolved gradually and is officially incorporated as a legal entity in Singapore in 2020. AHAD-AP has conducted several training workshops, published the Asia Pacific Principles of Haemophilia Care and created a format for outcomes data collection.

The AHAD-AP is governed by a Steering Committee as well as different standing committees.

Virtual Workshop

Comprehensive Care of Haemophilia

The Comprehensive Care training program for Haemophilia, has brought together multi-disciplinary health professionals from the Asia Pacific region, to share experiences, learn together and develop skills in the care of Persons with Haemophilia (PWH). At this time when many continue to fight the COVID 19 pandemic, we have chosen to conduct a virtual workshop. Although this limits our direct interactions, we shall explore different opportunities to share, teach and learn.

The objectives of this workshop are to

1. Understand the principles of Comprehensive (Integrated) Care in the Management of PWH
2. Strengthen and broaden knowledge and skills in diagnosis, assessment and planning care for PWH
3. Encourage repeated assessment and recording of complications of haemophilia and its treatment, to support clinical research and improvement of care.
